SMART CITIES

Global Technology & Investment Summit

>Goto French Version<

June 26,27,28th 2018 - Algiers

What is “Leapfrog Hack” ?

Leapfrog Hack is a Global Hackathon focused on the leverage of leapfrog technologies (AI, Data, Cloud, IoT, Fintech, etc.), organized as part of the Smart Cities global investors and technology summit 2018 By CSE Club and the Wilaya of Algiers.

An international jury, and various business/technology mentors from various parts of the world, will be joining the events, along with the participation of global technology players, venture capital and policy makers.

Website : <https://cse.club/leapfrog-hack>

What is “Startup Competition” ?

Startup Competition is a challenge that will gather the top 10 registered startups on the 28th of June within the Smart City Global Summit in the CIC.

The teams will take turns exposing their ideas and products to a jury, and at the end of the day, only one team will go home with the title of « Startup Competition Winner » and the prizes that come with it!

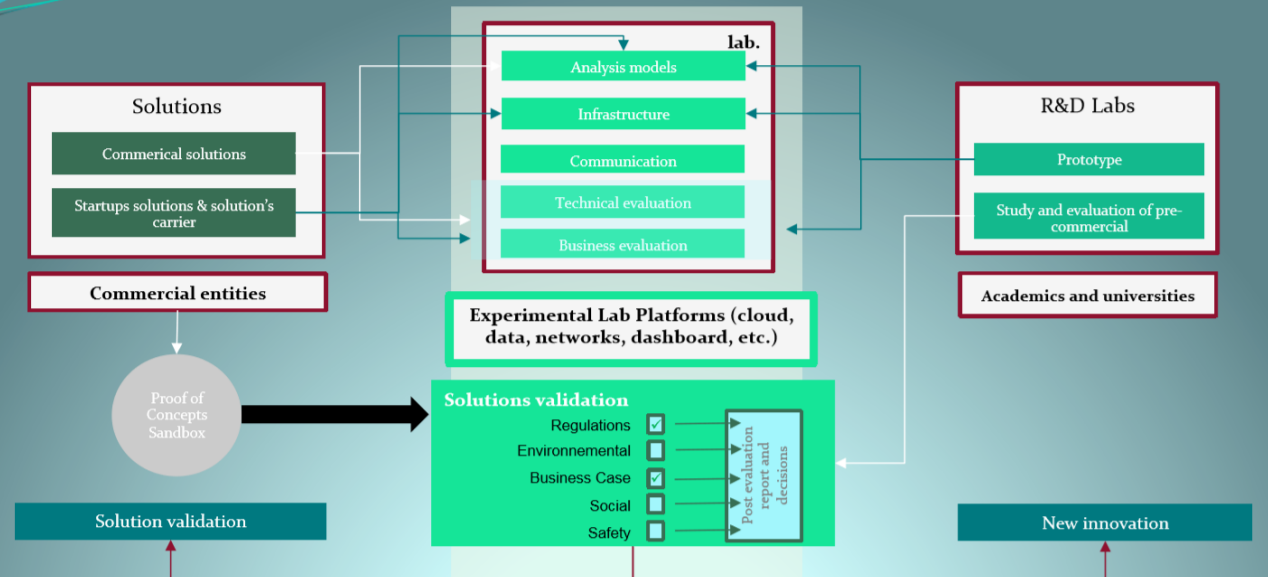

Website : <https://cse.club/startup-competition>

Venue: "DarTech" Hub and experimental Lab

The hackathon will be primarily hosted at the new "DarTech" hub and experimental lab that will be launching with the start of the hackathon which is an open sky live experimental lab that allows technology stakeholders to experiment with new technologies

Partners

We partnered with international organizations, startups and accelerators in addition to local industry and academic institutions

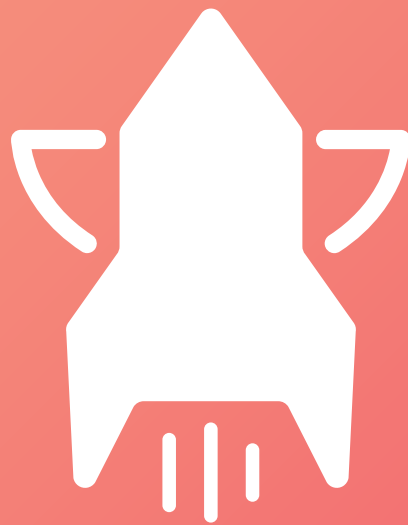

Why sponsor this event

- Participation in the largest hackathon in Africa and one of the first leapfrog initiatives in Algeria.
- International reach: event website, global press releases, global media
- Meeting and possibly recruiting the best developers engaged in the hackathon
- Promoting your Products/initiatives to elite developers and the overall community of the event on social media sites

Our event needs

- Prizes for the winning teams (from each category, Hackathon and competition).
- Suggestions of award models are welcome
